

Mosaic Glass Tutorial

©2000 – 2004 Elegant Designs by Lucy

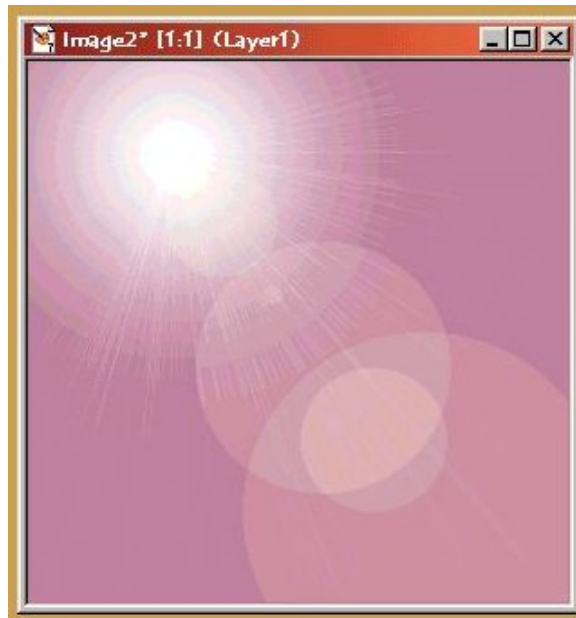

This is my first attempt at a tutorial, so please be kind. Someone asked how I did this background on my stationery, so I decided to give a tutorial a try. Hope you like the effects. You must have [PSP 7](#) and the program [20/20](#) to be able to complete it. So here goes nothing!

Have an image you would like to use in your stationery open and choose a color you would like to use for the background, do whatever it is you are going to do with your image and save it.

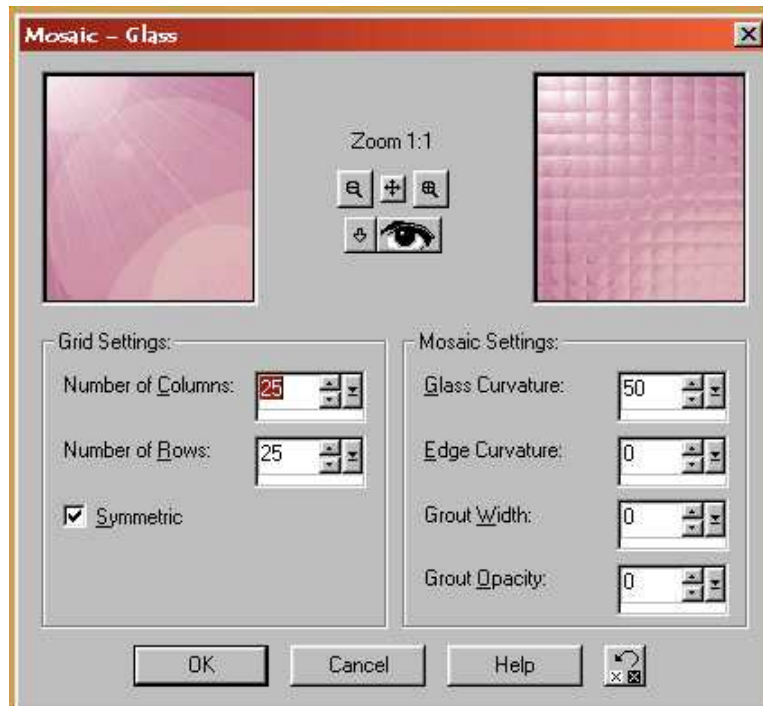

Open a new image in PSP 7 – 300 x 300. Flood fill it with color you chose from your graphic. Then go to Effects/Illumination Effects/Sunburst using the settings as pictured here:

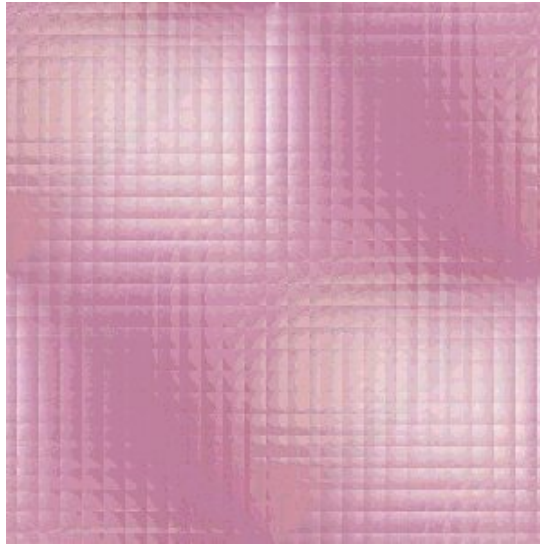

This is how your image will look after applying the sunburst effect.

Next go to Effects, Mosaic Glass and use the settings below:

You have to save this image and open it in the 20/20 program and do Tile effects, then save.

Be sure you save your finished background and enjoy. Hope you like the effect!

Please be sure to visit the rest of our site before you leave!
